

Matthieu BARBARESCO

API/Database designer

138, Avenue de la République  
91230 – MONTGERON

PHP/JavaScript/CSS developer

(+33) 6 18 60 44 97

Installation of web servers

[matthieu@barbares.co](mailto:matthieu@barbares.co)

<https://cv.barbares.co>

Git project manager

<https://github.com/matthieubarbaresco>

Experienced developer (10+ years) and self-employed since 2016, I have a strong interest in designing source code, database and APIs. Also, I am particularly motivated by learning and sharing within a team.

I also have some personal side projects, and I'm a volunteer for nonprofit organizations.

---

## Skills

---

English	C1 level

---

## Work experiences

---

PHP,  
ReactJS,  
VanillaJS,  
SQL

### **MKI – IMMOLEAD (06/2024 - 02/2025)**

- TMA (SQL, PHP, JS) on the CRM for real estate developers.
- Been proactive in creating new components (JS) in order to manage CKEditor5, OpenAI and other needs. Writing their technical documentation.
- Searched for some design patterns (PHP) and applied them in order to improve the modularity of the source code.

### **Yellow Korner (01/2023 - 04/2023)**

- TMA (PHP, JS, SQL) on the company's CRM: these interfaces, automated tasks (CRON), features, using external APIs.

### **Jackson & Kent (04/2017 - 05/2017)**

- Designed and developed various web projects (Phalcon, Laravel, vanillaJS).
- Created TDD (PHPUnit).

### **Fotokino (07/2022 - 11/2022)**

- Rewrote (PHP, JS) the WordPress theme of the association's website.
- Developed a Webpack project.

### **Club Med (02/2021 - 09/2022)**

- TMA of the website «CMTA Travel Agent».
- Developed a Webpack project.
- Responsible for the technical documentation.
- Supervised the source code quality with the lead developer.

### **Investment Design and Patrimony (05/2019 - 04/2020)**

- Created a restricted area to declare these accommodations for renting.
- Developed a WordPress theme, overrode the database schema. Embedded Stripe Payment. Used Mailjet API.
- Installed and secured a web server (LAMP) on a cloud instance (OVH).

WordPress,  
Webpack,  
SQL,  
API

### **EpressPack (09/2017 - 02/2018)**

- Created a source code base (ACID) based on predictable developments (PHP/JS).

### **Mahi Mahi (11/2017 - 01/2018)**

- Designed a REST API from the BuddyPress database schema. It overloads the WordPress API.

### **Awak'IT (10/2015 - 10/2016)**

- Technical calculations for WordPress projects.
- Technical management of the WordPress team.
- Developed various WordPress websites.

### **Typology (01/2019)**

- Developed (PHP, AWS Lambda) a microservice called by a Shopify store.

Microservices,  
PHP,  
AWS,  
Node.js,  
DynamoDB

### **RedPill (04/2018 - 05/2018)**

- Created a REST API (Node.js, AWS Lambda) and a database schema (DynamoDB), all orchestrated by Serverless.
